August 1, 2007

Robert McDowell
Commissioner, Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear Robert McDowell:

The Internet has become an integral part of American life and will only become more important in the future. That is why all Americans, especially American school children, need access to Internet service that's free, and fast - at school and in the home.

Unfortunately, current prices for broadband in the United States are among the highest in the world. No American child should be left behind because existing broadband options are not affordable.

Furthermore, implementation of a proposal now pending with the FCC, such as the one submitted by M2Z Networks (www.m2znetworks.com) to provide a universal, free, and fast broadband service, is supported by the Coalition for Free Broadband Now and is a necessary step to both ensuring that American school children, parents and teachers have affordable broadband access and to protecting our children online. I urge you to act on such proposals today!

Sincerely,

Fred Tenzer

Federal Communications Commission
Office of the Secretary

July 31, 2007

Jonathan S Adelstein
Commissioner, Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear Jonathan Adelstein:

America's broadband Internet goals are going unmet and America's international position is rapidly falling. Many American families, schools and libraries cannot afford broadband and most of rural America cannot even get access to the broadband Internet.

Once online, many families are concerned about the growing threat to children of easily accessible indecent and pornographic material. And public safety organizations often can't work together due to incompatible data networks.

It doesn't have to be this way. I urge you to support the M2Z Networks (www.m2znetworks.com) plan to put America back on the right track by providing 95% of America with access to a free, fast, and family-friendly wireless broadband Internet. It will make us safer. We will become more competitive. It will create equal opportunity. It will improve our great country.

Please support M2Z today.

Sincerely,

Son Bui

Robert McDowell
Commissioner, Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear Robert McDowell:

The Internet has become an integral part of American life. We rely on it to learn, work, play and communicate on issues of importance to our communities. That is why all Americans - regardless of income, education or location - need access to Internet service that's fast, free and family-friendly.

Our nation's future broadband system must be engineered to bridge the digital divide that now separates too many Americans because of their economic circumstances and where they live. We must extend to all Americans the opportunity to take part in e-commerce, use government services, access news, information and educational opportunities and participate in civic discourse online.

Unfortunately, current broadband prices in the United States are too high and far too many households have limited or no connectivity. No American should be left behind because existing broadband options are not affordable or unavailable. Furthermore, the government should be working with business leaders to make sure that all students have Internet access that is fast, reliable and as safe as possible. Parents and teachers are currently saddled with the burden of trying to protect children from indecent content on the Internet. Network level filtration of indecent content is the best solution available to ensure that children cannot access explicit Websites, allowing parents and teachers to focus on the educational resources available online.

Implementation of a fast, free, and family-friendly universal broadband access program, like the proposal submitted by M2Z Networks (www.m2znetworks.com) and supported by the Coalition for Free Broadband Now, is a necessary step towards protecting our children online while ensuring that all Americans have affordable Internet access. This solution would remove many of the technological challenges currently faced by underserved communities - both urban and rural. It will also help build an Internet-savvy population to drive the American economy to compete globally, provide the equality of access that is such an important step towards equality of opportunity.

I urge you to take action now to ensure these steps are taken.

Sincerely,

Brandon Korman
